Download a day after the new betas of macOS Catalina 10.15, iOS 12.4 and lookOS 5.3 out, which came after one of Mac OS Mojave 10.14.6, today is the turn of iOS/iPadOS 13 Bedrock 4 (build 17A5534f). This was the fourth beta version of the operating system of iPads, iPhones and touch iPods were long past, as many users reported that there was some series of the second in the third – which is not extremely rare to reach beta phases. While pole-fixing the system and fixing bugs, Apple can still make the most noticeable changes here and there. If we find anything, of course, we're going to figure you out. At least for now, iOS/iPadOS 13 on Behalf 4 is only available to developers. Soon, however, Apple is also expected to release the third public beta version of them (with an equivalent build) of members of the Apple Beta Software Program. Apple's new system are expected to be officially released to all users in September/October only. There's still a lot of rolling water... Update 17/07/2019 at 14:31 Apple also made available today developers their watchOS 6 on behalf (build 17R5532f), tvOS 13 on Behalf 4 (17J5526e) and Xcode 11 Beta 4 (11M374n). Similarly, we will stay connected and let everyone know if news is relevant to these new test builds. Updated II 17/07/2019 at 17:58 Here's some news from iOS 13 Beta 4! There's a refreshed look for quick action in iOS 13 Beta 4, which now includes a 'Reorange Apps' button to enter wooden mode without pipe & hold pic.twitter.com/wqtJFrXvGC – Federico Viticcii (@viticcii) July 17, 2019 Also note that the top menu has become smaller and that Apple has moved the icons to each line on the right side; in addition, there is a new internal setting that shows the duration ring (slow or fast). For VentureBeat, all this work that Apple has done is, yes, a strong indication of the imminent end of earning 3D. The audio message to send the Message icon went into a microphone in a sound wave. Other than that there are other small editing details, such as a color reversal on the shared sheet buttons (how they are white on a gray background), widget editing buttons in tablet format, new animation when sharing images, among others. This new beta is resolved who gave access to the user's password, via MacRumors, 9to5Mac Update III 17/07/2019 at 18:34 Good discovery Brazilian Guilherm Rambo: On iPadOS [13] Beta 4, if you hold the globe key and press Delete on the Smart Keyboard, it will delete ahead, as pressing the Fn key on a Mac. ↗ Update IV 18/07/2019 at 14:32 Apple has just made available, for members of the Apple Beta Software Program, the third public test build of iOS 13, iPadOS 13, macOS Catalina 10.15 and tvOS 13. Send for the tests! 🎉 Help make the next releases of iOS, iPadOS, macOS, tvOS and our best viewing yet. As a member of the Apple Beta Software Program, you can take part in apple software by test-driven pre-release version and let us know what you think. Learn

more about the next releases. Enroll already a member? Signing in as a member of the Apple Beta Software Program, you will be able to enroll your device to access the public beta and try out the latest features. You can provide feedback directly to Apple using the Feedback Assistant app. There has been much talk of the possible delay in the launch of the new iPhones in the 12 series. Out of curiosity, at this point a year ago, Apple did not drop by 4 for the next iOS, but beta 6. So we can say that there are at least two weeks here at different times in versions released in the test versions. This delay in iOS 14 means nothing? Despite this curiosity, today Apple has brought more fixed and some news to the operating system of the iPhone. Apple today released the fourth version for developers, iOS and iPadOS 14, watchOS 7 and tvOS 14 for testing. So with these versions, users who use these versions help improve and refine the system. However, with every version coming out, their novel decreases, as a robust increasingly robust, stable and equipped starts out. Apple TV widget - Now there is a new Widget Apple TV available in this fourth beta version. Research improvements – Way content searches in the search bar to show mute. Now the web result appears first, then Siri apps and suggestions. 3D Touch – 3D Touch, which was not available in the latest beta, is working again on compatible devices. Exposed API notifications – Expose the API notifications that have been added to this beta, so iOS 14 users can download apps that use Exposure notifications. As it was possible to notice, besides these news and anyone else who may appear, there has been a fix to some Pugs. So you should find the more stable and consuming system less energy. What iPhones will be supported? After the information, if iOS 14 ends up supporting the same set of devices as iOS 13, these iPhones should be compatible with it: iPhone 6s /iPhone SE Original iPhone 7 and iPhone 7 Plus iPhone 8 and iPhone 8 Plus iPhone XS iPhone XS and iPhone XS Max iPhone XR iPhone 11 iPhone 11 Pro and iPhone 11 Pro Max 2020 iPhone SE Annually Apple launches a new operating system for its devices, even if they don't bring many new features, the schedule is still met. In 2019, before the official release, users can try the iOS 13 public beta and advance some news about the iPhone. Among these gifts, you can finally highlight Night Mode on iOS, which makes the system more comfortable to use in dark environments. This is a common practice in app developers, but it wasn't yet on Apple's mobile system. The photos and safari apps received some improvements. The reminders were completely moved to find some new features. What was already helpful for many people, is improving even more. In access, iOS 13 brings voice control. Unlike before, you can now control absolutely everything by voice commands. Other performance improvements and app download management have also been applied to iOS 13. How to install the iOS 13 public beta before starting: We show that the public beta is not a final version, so it's subject to bugs and incompatibility with some apps. The use of beta-phase operating systems can lead to file loss and headaches, not everything can work as it should (again). It is highly recommended to do a backup before installing the version. How to back up your iPhone to iTunes or iCloud How to install iOS 13 public beta: Access beta.apple.com with your iPhone; Tap the blue button that says Register; Sign in with your Apple ID; Accept the terms and conditions of Apple's beta program; On the next screen, make sure that iOS check and then scroll the page and tap Enroll your iOS device link; In the next step, tap the Azure Download Profile button; Type Allowed; Go to the Settings app on your iPhone; Select Download Profile below your name; Tap Install; Set your password; Tap Install again; Tap Restart iPhone; After you restart your iPhone, go back to Settings and General pipes; Select System Update; Wait for the download update to complete the installation. When and for whom does it happen? Apple is most likely to release the final version in September 2019, along with the release of the new iPhones. iOS 13 is compatible with iPhone 6S and higher with seventh-generation touch iPod. The iPad found another dedicated system, the iPad OS, which should also happen on the same date. iPodHacks142 This Week Apple released the 4th beta for developers (3rd public beta), and more evolution and changes than will be the future system of the iPhone and iPad. If you're curious what's changed, check out this list. Fixing new beta fixed some bugs while holding The vulnerabilities that allow you to see all the passwords on the device have been resolved and no longer happens, thankfully. In contrast, the itau application (PF) continues to close un expectations for those who have apologized to safeguard the account data. Perhaps it is an application that is only fixed with an update. On your iPhone, it continues to prevent it from tearing a connection with the lock screen. 3D Touch Rehabilitate 3D Touch has returned to work as it should be on compatible iPhones. The pressure makes a difference again, as Craig Federighi has already announced. However, in the Accessibility menu dedicated to Touch 3D, in beta 4 it is now called 3D Touch & Haptic Touch. Further evidence that the next iPhones may come without touching the 3D build of the hardware. The menu countenance of menu apps that appear when our long-touch an app icon on the Home screen (or press with 3D Touch) became smaller in beta 4. Menu to rearrange and delete apps With the history of the system adopt the long press also on the iPad and device without 3D Touch, the bid to press the icon for a while for it to start shaking and we can move it or even delete it, has become more annoying. To do this, you need to stay longer with your finger still until the icons start to shake. To try to improve this faltering design, Beta 4 brings a new option in the context menu of icons, called Rearrange Apps (not yet translated into Portuguese). It just serves to make the home screen icons formally and we can move them wherever we want. Similarly, the experience is even worse than it has been until iOS 12. Voice message icon who never confused the voice message button (the one you recorded a sent audio) and this to Dictate? I already have. That's because they're the same, using a microphone as a symbol. Beta 4 puts an end to this by presenting a different icon for message recordings. It took Jony Ive to leave for that change??? Trending in the Activity app in the activity app (available for those who sync an Apple Watch iPhone), trends based on user's physical activity appear in Beta 4. This is one of the gifts of iOS 13. More translations plus parts of the system have been translated into the Portuguese, such as the signal that appears at the top of the screen when you turn the mute iPhone button on or off. iOS 13 is currently in the testing phase and is expected to be released to the overall public only in September. To learn more about the news in the new system, follow our assurances at this link.
